2. Materials and Procedure

Students list all materials used and describe the step-by-step process of their experiment.

Tips for teaching this component:

- Use bullet points or numbered lists for clarity
- Encourage students to be detailed but simple

Sample:

- Materials: Small pots, soil, sunflower seeds, water, a window
- Procedure:
 - Fill the pots with soil.
 - Plant three sunflower seeds in each pot.
 - Place one pot in sunlight, one in the dark, and one in partial sunlight.
 - Water the plants daily.
 - Observe and record growth each day.

3. Observations and Data

Students record what they see, hear, or feel during their experiment. Visuals like drawings or charts enhance understanding.

Example:

- Drawings of plants at different stages
- A simple table recording daily growth measurements

4. Results and Findings

This section summarizes what the data shows, often with sentence starters to guide young writers.

Sample sentence starters:

- "I noticed that the plant in the sunlight grew taller."
- "The plant in the dark did not grow much."

5. Conclusion

Students reflect on whether their hypothesis was supported.

Example:

- "My hypothesis was correct. Plants need sunlight to grow because the plant in the dark did not grow."

6. Next Steps or Questions

Encourage curiosity by prompting students to think about what they want to explore next.

Sample:

- "Next, I want to see if watering affects plant growth."
