- Determine if neurofeedback is appropriate for you and identify specific areas to target

Tip: Be prepared to share detailed information about your mental health history, medications, and lifestyle for a thorough assessment.

Step 2: Developing a Personalized Treatment Plan

Based on the assessment, your practitioner will design a tailored neurofeedback protocol. This plan considers:

- Your specific symptoms and goals
- Your brainwave profile
- The frequency and duration of sessions needed
- Any adjustments for co-existing conditions or medications

Typically, a treatment plan may include multiple sessions over several weeks or months, depending on your progress.

Step 3: Preparing for Your Neurofeedback Sessions

Before your first session, consider the following preparations:

The goal is to reinforce healthy patterns by rewarding desired brain activity, encouraging your brain to adopt more optimal states over time.

Post-Session Reflection

After each session, practitioners may discuss your experiences, note any changes, and adjust the protocol if necessary. Keeping a journal of your mental state, mood, and physical sensations can help track progress.
